WORK EXPERIENCE

Associate Engineer Kore.ai

11/2022 - 06/2024

Hyderabad, India

AI Chat Bot Platforms:

- Developed Retail Assist-focused Customer Experience chatbots using Kore.ai platform. Implemented advanced search using vector databases and custom ML models and integrated LLM's (Large Language Models) in chatbots
- Utilized AWS services like S3 and DynamoDB code commit and CI/CD for efficient development. Created backend REST APIs for LLMs and databases. And also integrated some kore.ai platforms into our Retail Assist products like Smart Assist and Work Bench.
- Integrated chatbots with various messaging channels such as Facebook Messenger, WhatsApp Messenger and demonstrated those CX flows and channels in National Retail Federation Event. Implemented natural language processing and machine learning techniques for chatbots conversations.
- I integrated and worked closely with search assist platform, gaining a good understanding of web crawling, structured data, and document search approaches. Uploaded documents and made configurations in accordance with OpenAI to ensure the platform's functionality. I also learned how search functionality works in different search logics.
- The projects I have worked on are related to retail products, Columbia Sports, LG, and Lowe's document search.

EDUCATION

Bachelor of Technology

Dhanekula Institute of Engineering and Technology

06/2018 - 06/2022

Vijayawada

Junior College - Intermediate

Narayana Junior college

06/2016 - 04/2018

Vijayawada

10th Standard

Narayana E-techno School

06/2015 - 04/2016

Vinukonda

SKILLS

AWS Services: AWS Lambda, S3, EC2, RDS, CloudWatch, VPC

AI Technologies: Machine Learning (PyTorch), NLP, Data Analysis (Pandas, NumPy)

Full Stack Development: HTML, CSS, JavaScript, React, Node.js, Express, MongoDB

PERSONAL PROJECTS

Stress Detection and Analysis in working environment (11/2021 - 04/2022)

- Work related stress can impact both physical & mental health, leading to severe consequences such as depression & heart problems. Employing the SVM algorithm on a dataset allows for the detection of stress levels and evaluation of performance metrics to address these concerns.

Travel Assist | XO Botbuilder, Node.js, MongoDB, NLP. (12/2022 - 01/2023)

- Developed "Travel Assist" chatbot using Kore.ai XO Botbuilder. Provided city-wide travel option with personalized recommendations & different types of cars depending on customer selection. Led the integration of feedback collection, rent alerts, and user authentication functionalities. Ensured data security and personalized experience by implementing user authentication through login credentials.

CERTIFICATES

AWS certified cloud Practitioner

https://www.credly.com/badges/fbdfa4bf-91a6-4514-854f-c0a8c3aad4b9/public_url

Object Oriented Programming Language (12/2019 - Present)

Completed a certification course on "object oriented programming in java", in Coursera

LANGUAGES

Telugu

Native or Bilingual Proficiency

English

Full Professional Proficiency
